

Buildcorp Service

Instructions:

1. Connect your wireless laptop, tablet or smartphone to the Buildcorp Wi-Fi network.
2. Start your web browser and you will be automatically directed to the login/sign-up page. Click the link to purchase an account.
3. Once you have selected your data plan you then create a username and password of your choice. Once this process is complete your credit/debit card will be charged via PayPal and you are now ready to use the internet.
4. Once connected to the wireless network you will be prompted to change settings regarding the wireless service. Ensure that you turn file sharing OFF, set your connection to PUBLIC network, and turn your firewall ON.
5. You may also setup an automatic payment with us to bypass the prepay system so we keep you connected for the length of your tenancy. Get in contact with us if this sounds like the best option for you.

For technical support on connecting to the service please contact us wifi@buildcorp.co.nz
